

# Current State and Future Plans for AZGeo

## AZGeo Current State

- AZGeo is Arizona's central repository for geospatial data and statewide geographic information system services.
- Over 5000 users from 400 agencies and organizations participate in AZGeo by providing data, metadata, and services to support the sharing of geospatial data.
- AZGeo is hosted by the Arizona State Land Department and staffed by the Arizona Land Resources Information System (ALRIS).
- AZGeo will receive minor updates during 2019 and will be re-released on a new server platform in 2020.

## AZGeo Future Plans

### 2019 Platform Refresh Plan

- The AZGeo workgroup is researching and investigating new platform options for the Platform Refresh
- High priority issues and some user-suggested enhancements will be addressed in 2019
- Please contact [Agic\\_Info@azland.gov](mailto:Agic_Info@azland.gov) with enhancement requests or suggestions

### 2020 Re-Release

- AZGeo will be updated and hosted on new servers and, most likely, a Cloud-based platform
- The new site will feature many more enhancements based on feedback from users, AGIC, and ALRIS
- An updated development and long-term support plan will be in place to ensure a continued increase in user/agency confidence and participation.
